Industrial Methane Monitor

The COMET® Industrial Methane Monitor (IMM) from Miltope continuously monitors methane (CH₄) concentration in ambient air in outdoor and indoor industrial environments as part of leak detection, emissions monitoring, or emissions reporting infrastructure.

The unit can be deployed with the COMET® monitoring platform or in integration with third-party monitoring platforms using an industry-standard communication interface.

The COMET IMM uses sensor fusion technology to provide reliable and accurate methane concentration measurements in an intrinsically safe design for hazardous environments.

SPECIFICATIONS

CH ₄ Measurement Range	0-5000 ppm
Resolution	10 ppb
Operating Temperature	-10 to +50° C
Operating Humidity	0-95% RH
Sampling Rate	10 Hz
Measurement Interval	1 second
Power	12 VDC
Dimensions (WxHxD)	3.5x7.7x2.3 in.
Weight	1 lb.
Intrusion Protection	IP65
